

# LIN Jie

Research Scientist, Group Leader, Principal Investigator

Machine Intelligence Department, Institute for Infocomm Research ( $I^2R$ ), A\*STAR, Singapore

• Homepage • lin-j@i2r.a-star.edu.sg • +65 - 6408 2856

## R&D ACHIEVEMENTS

Since 2018, I lead the Edge AI group in  $I^2R$ , with the focus on development of compact neural networks and the applications for the **next-generation deep learning hardware, efficient deep learning on encrypted data for privacy preserving, TinyML for IoT**, etc.

From 2011 – 2014, I served as core contributor to the MPEG-7 International standardization on **Compact Descriptors for Visual Search (CDVS)** \*. Contributions on **scalable and compact global descriptor** are adopted by MPEG CDVS as one of the three core technologies, competitors include Stanford IVMS lab, Huawei, University of Surrey, Samsung, ST Electronics, etc. Over 20 proposals have been submitted, with 8 patents granted, one of the grants received the 19<sup>th</sup> **China Excellent Patent Award** (National Award). The invented technology has been adopted by Tencent **WeChat open platform**<sup>†</sup>, **Baidu mobile app**<sup>‡</sup>, etc. It also initiated a startup **Boyun Vision**<sup>§</sup> in Beijing, China.

## EDUCATION

**Beijing Jiaotong University**, Beijing, China

- Ph.D. in Computer Engineering 2006 – 2013
  - Thesis: Compact Aggregated Descriptors for Mobile Visual Search
  - Keywords: Mobile Image Search, Data Compression, MPEG-7 Standardization
- B.S. in Computer Science and Technology 2002 – 2006

## RESEARCH INTERESTS

Deep Learning, AI Hardware, Privacy Preserving Machine Learning, Data Compression, Computer Vision

## WORK EXPERIENCE

**Institute for Infocomm Research, A\*STAR, Singapore**

- Group Leader / Edge AI Group, Principal Investigator Jun 2018 – present
  - Next-generation edge AI hardware via full stack hardware-software co-optimization from deep learning algorithms down to silicon
  - New methods for compressing deep neural networks towards fast, small and energy-efficient neural network inference for privacy-preserving applications
  - Multi-modal deep learning and semi-supervised deep learning algorithms for perception tasks in challenging environments
- Research Scientist Aug 2014 – May 2018
  - Deep learning based compact representations (**64~1024 bits**) to enable ultra-fast image and video search

**Institute of Digital Media, Peking University / ROSE lab, Nanyang Technological University**

- Visting scholar, Advisor: Prof. DUAN Lingyu, Prof. GAO Wen Sep 2011 – Jul 2014
  - Participate in the MPEG-7 international standardization on Compact Descriptors for Visual Search (CDVS)
  - Develop compact global descriptor termed **Scalable Compressed Fisher Vector (SCFV)**, which has been adopted as one of the three key technologies in final MPEG CDVS.

## PROJECTS

**Principal Investigator** - Hardware-Software Co-optimization for Deep Learning (Work Package 1)

- S\$ 8,358,000.00, Jun 2018 – May 2023
- Develop the next-generation deep learning inference hardware with 10x to 100x improvements on bandwidth and throughput

**Principal Investigator** - Accelerating Homomorphic Encryption (Work Package 1)

- S\$ 1,200,000.00, Feb 2020 – Jan 2023
- Develop compact neural networks for secure and fast deep learning inference on encrypted data.

**Principal Investigator** - Edge SoC with AI Acceleration

- S\$ 640,000.00, Apr 2020 – Jun 2021
- Develop full System-on-Chip platform with custom deep learning accelerator for ultra-low power IoT applications.

<sup>§</sup><http://www.boyunvision.com.cn>

## Work Package Lead - Deep Learning 2.0 Programme

- S\$ 1,950,000.00, May 2017 – Nov 2018
- Solve hard cross-disciplinary problems in deep learning, e.g. multi-modal deep learning, deep learning on embedded devices, incorporating knowledge into deep learning, etc.

## HONORS & AWARDS

- Top 10% paper at The 26th IEEE International Conference on Image Processing (ICIP) 2019
- Best Paper Finalist at The IEEE/ACM International Symposium on Low Power Electronics and Design (ISLPED) 2019
- A\*STAR TALENT Award 2018
- The 19<sup>th</sup> China Excellent Patent Award (Ranked at 2 out of the 7 inventors) 2017
- Best Paper Finalist at The ACM International Conference on Multimedia Retrieval (ICMR) 2017
- 1st place in Image Conference and Labs of the Evaluation Forum (ImageCLEF 2017) Lifelog Summarization Benchmarking Competition<sup>¶</sup> 2017
- Ranked at **Top 3% out of 650 teams** in Kaggle Google Cloud YouTube-8M Video Understanding Challenge<sup>¶</sup> 2017
- Ranked at **Top 2% out of 1972 teams** in Kaggle Data Science Bowl 2017 Lung Cancer Detection Challenge<sup>\*\*</sup> 2017
- Core contributor of MPEG International Standard CDVS Ad-hoc Group 2012 – 2014
- Outstanding Individual Award in NELVT<sup>††</sup> 2013
- Top 10 outstanding graduates in National Engineering Laboratory for Video Technology (NELVT), Peking University
- Excellent Fellowship, Beijing Jiaotong University 2004 – 2006
- For attaining a semester GPA ranked at Top 5% out of 400 undergraduates

## PROFESSIONAL ACTIVITIES

### Reviewers

- CVPR, ICCV, AAAI, IJCAI, ICMR, ICIP, ICME, etc.
- IEEE T-IP, IEEE T-MM, IEEE T-NNLS, IEEE T-CSVT, IEEE RAL, Journal of VCIP, EURASIP Journal on Image and Video Processing, etc.

## LANGUAGES

- Mandarin: Native. English: Fluent (speaking, reading, writing).

## SKILLS

C/C++, Matlab, Java, Python, OpenCV, VLFeat, MatConvNet, Caffe, TensorFlow, PyTorch,  $\LaTeX$
